

Important Information about Your Drinking Water Availability of Monitoring Data for Unregulated Contaminants for the Haverhill Water Department

As required by US Environmental Protection Agency (EPA), our water system has sampled for a series of unregulated contaminants. Unregulated contaminants are those that don't yet have a drinking water standard set by EPA. The purpose of monitoring for these contaminants is to help EPA decide whether the contaminants should have a public health protection standard.

The Haverhill Water Department monitored for the UCMR3 program for a 12 month period from 2013 until 2014. The results are in the 2013 and 2014 Consumer Confidence Reports. You can find Haverhill's four most recent CCRs at the Water Treatment page on the City's website at <http://ci.haverhill.ma.us/>.

What should I do?

You do not have to do anything, but as our customers, you have a right to know that these data are available.

You may share this information with other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, food establishments, medical facilities and businesses).

For more information

For additional information on your water see your water department's Consumer Confidence Report (CCR), delivered by your water department by July 1 of each year. If you have any questions about your CCR, see the contact information below for your water department.

For information on the Unregulated Contaminant Monitoring Program, visit the MassDEP website (<http://www.mass.gov/eea/agencies/massdep/water/drinking/water-systems-ops.html>) and navigate to Unregulated Contaminant Monitoring Program.

If you want to speak with someone at the water department about the results or copies of past CCRs, please contact Mary D'Aoust at 978-374-2385 or at Haverhill Water Treatment Plant, 131 Amesbury Rd., Haverhill MA 01830.
